

# Essential repairs to Amohau Street, Rotorua

Essential repairs to State Highway 30A (SH30A) Amohau Street in Rotorua begin on Monday 19 January using a sequence of overnight road closures.

As a key urban route, these repairs are a priority and will provide a longer lasting road surface, meaning the road will need less maintenance and repairs in the future.

## What we are doing

The road surface on SH30A has been patched for many years now and requires a full rebuild.

The road will be excavated down to its foundations and progressively reconstructed layer by layer from the base up.

The road sits within an active geothermal zone, which affects the foundations and adds complexity to the job. Before work begins, the team will investigate to identify any potential issues, such as tomos, so these can be addressed before digging out the road.

We have worked closely with our contractor Higgins and Rotorua Lakes Council to develop an approach that balances keeping traffic moving while completing the work safely and efficiently.

Starting in mid-January before the school year starts, and focusing first on the eastbound lanes, helps reduce impacts on morning commuters and allows the community time to adjust to the works.

We thank Rotorua motorists in advance for their patience and cooperation ahead of these nightworks.

**SH30A is closed between Te Ngae Road and Hinemaru Street from Monday 19 January from 7pm to 6am, Sunday to Thursday (open Friday and Saturday nights).**

Allow extra time for your journeys and plan ahead during the works.

Work will start on the eastbound lanes of SH30A between Te Ngae Road and Hinemaru Street, before moving to the westbound lanes.

The work is expected to take up to 3 months, depending on weather conditions.

**Closure and detour**

**Amohau Street closed**

**Light vehicle detours**

**Cycling and foot traffic alternative routes**

**HPMV/freight detour**

**1** There is no footpath for a 300m section

**2** One short steep hill - shingle surface
